ONLINE DESIGN, VISUALISATION TOOLS & SERVICES

Online Design Platform and Tools

2D and 3D tools, makes it simple to search dynamic product libraries, recolour patterns, combine products and view them installed in spaces or floor plans for scale and context in real time.

The online tools also integrate with our Dashboard technology, allowing for the tracking of marketing information about popular online views, designs, and orders of both sustainable samples and physical samples.

Content Management System

Our Content Management System puts you in control, update information quickly and respond to market demands faster.

Carpet & Fabric Texture Mapping

Our powerful texture mapping software allows us to provide texture mapping solutions for both the carpet and fabric industry.
