

interested in learning more about apso design solutions?

Be it in-house or independent product development, **apso** software makes creating textile and carpet patterns brilliantly simple and efficient for the designer. Explore colour options. Change scale.

Modify motifs. View virtual installations.

Share ideas. Do it all quickly and without the expense or delay of producing physical samples.

apso online web tools and design studios enable manufacturers to give their customers a preview of new products months ahead of production.

Customers can experiment with colour, save favorites and view designs in a variety of spaces.

ONLINE TOOLS & SERVICES

Explore + Create

ONLINE DESIGN, VISUALISATION TOOLS & SERVICES

Online Design Platform and Tools

2D and 3D tools, makes it simple to search dynamic product libraries, recolour patterns, combine products and view them installed in spaces or floor plans for scale and context in real time.

The online tools also integrate with our Dashboard technology, allowing for the tracking of marketing information about popular online views, designs, and orders of both sustainable samples and physical samples.

Content Management System

Our Content Management System puts you in control, update information quickly and respond to market demands faster.

Carpet & Fabric Texture Mapping

Our powerful texture mapping software allows us to provide texture mapping solutions for both the carpet and fabric industry.
